I am interested in **Web-Development (FULL STACK)**. I can Create **Static**, as well as **Dynamic Websites** and trying to *scale up my skills* daily by creating some valuable projects and getting knowledge from experts.

PROJECTS

INTERNSHIP PROJECT (REACT JS, API [PHP], MYSQL)

FRONTEND & BACKEND, *www.redskyeducations.co.in*

The *Institute Management Portal* contains dynamic pages with live data. All types of operations on dashboard, student, course, payment, daily Register, Attendance is available. *A Task panel* is also available to assign tasks to each student and task marking (complete, incomplete, cancel) functionality is also created.

INSTITUTE WEBSITE (HTML, CSS, JS, PHP, MYSQL)

FRONTEND & BACKEND, *www.wordsworthschool.com*

Worked as a *front-end & back-end developer*. It has *dynamically student add, modify, delete, payment records* form **Admin Panel**, also has **student panel** with an awesome *Login page.*

PRODUCT SALE WEBSITE (HTML, CSS, JS, PHP, MYSQL)

FRONTEND & BACKEND, *www.diptiagrotech.com*

This website contains some basic pages along with a **Product Page** (*fertilizer products*). After choosing *a product & its quantity,* you will be redirected to the Company WhatsApp chat (as per the requirement of the company)

CREATIVE PROJECTS (HTML, CSS, JS)

FRONTEND & API

I have created some awesome projects earlier. **Cowin Auto Slot Finder, Tic-tac-toe, Word Counter, Temperature Converter, Color palate, Typing Test, Analog clock, Note Tracker**, etc.
